Why Concrete Grinding?

Every year, raised, cracked and improperly maintained sidewalks cause thousands of trip and fall injuries. Grindco can help property owners and managers eliminate their sidewalk liability for much less than traditional concrete replacement costs.

Costs

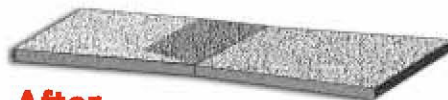

Concrete grinding costs up to 90% less than standard concrete replacement. Pricing is based on the number of locations that need to be ground at a property. A surface up to five feet long and two inches thick is considered one grind. We offer free estimates.

Better Repair Solutions

Concrete grinding is fast and efficient. It eliminates trip hazards in minutes. Most jobs can be completed in one day, and cleanup is quick and easy. Concrete grinding eliminates the need for jack hammers, roped-off areas and other disruptions that occur with wet concrete replacement. Grinding simply removes the dangerous lifted edge, sloping the surface to meet an adjacent slab. This process effectively eliminates trip hazards.

After

Annual Inspection Plan

To keep your sidewalks free of trip hazards Grindco offers its own no-cost sidewalk inspection program for property owners and management companies. We provide annual inspections of all concrete walkways on a property. Upon completion of our inspection, we will forward a written quote detailing our findings.

your concrete grinding solution

Grindco helps reduce the liability of property owners and managers by identifying and eliminating their sidewalk trip hazards. For a free site inspection and quote please call:
